

KRATIKA SINGH

+91 7318049850 ♦ Kanpur, India

kratikasingh2609@gmail.com || linkedin.com/in/kratika-singh || github.com/KRATIKA-SINGH

PROFILE

Computer Science undergraduate with interests in Machine Learning, Artificial Intelligence, Computer Vision, and Software Engineering. Experienced in developing data-driven solutions through research-oriented projects involving signal processing, NLP, and predictive modeling. Passionate about advancing intelligent systems through applied research and scalable software development.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur

Bachelor of Technology in Computer Science and Engineering (Data Science)

2023 – 2027 | CGPA: 8.55

Jpsn Inter College, Kanpur

Class XII (UP Board)

2022 – 2023 | Percentage: 80%

Class X (UP Board)

2020 – 2021 | Percentage: 77%

SKILLS

Languages: Java, Python, C

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, Scikit-learn, OpenCV

Data Science: NumPy, Pandas, Statistical Analysis, Data Visualization

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Web & Databases: HTML, CSS, JavaScript, React.js, MySQL

Tools: Git, GitHub, VS Code, Jupyter Notebook, Matplotlib, SciPy

RESEARCH EXPERIENCE

Machine Learning Research Project – rPPG Drift Analysis ([source code](#))

(Feb 2026 - Present)

- Conducted research on remote photoplethysmography (rPPG) for contactless heart-rate estimation from facial videos.
- Applied signal processing and machine learning techniques for physiological signal extraction.
- Evaluated model performance under varying illumination and motion conditions.
- Performed experimental analysis and optimization to improve prediction accuracy.

PROJECTS

Fake News Detector – TRUTHGUARD ([source code](#))

(Sept 2025 – Dec 2025)

- Developed a Fake News Detection System using Machine Learning and NLP techniques
- Used TF-IDF and Logistic Regression for text classification
- Improved classification accuracy on to 90% using TF-IDF + Logistic Regression on real-world datasets
- Tools: Python, Scikit-learn, Pandas

Raksha Signal – An Emergency Alert System

(Oct 2024 – Jan 2025)

- Designed an emergency response application for accident situations
- Implemented an emergency alert workflow to notify nearby hospitals, police stations, and emergency contacts using API-based communication.
- Focused on system workflow, alert-logic, and API-based communication

ACHIEVEMENTS

- 5 - Star Problem Solver on [HackerRank](#).
- Solved 400+ Problems on various Online Platforms - [LeetCode](#), [HackerRank](#), [GeeksforGeeks](#).
- [Shortlisted for Flipkart GRiD 7.0 \(2025\)](#).
- [Selected for the final round at TechExpo \(PSIT\) for the project “Vijay Drishti”](#).

CERTIFICATIONS

- Certification by **HackerRank**- [Python\(Basic\)](#) || [Software Engineer Intern](#) || [Problem Solving\(Basic\)](#) || [Java\(Basic\)](#)
- Certification by **Microsoft**- [Generative AI for Data Science](#)
- Certification by **IBM Skillsbuild**- [Artificial Intelligence Fundamentals](#)
- Certification by **Forage**- [Solutions Architecture Job Simulation](#)
- Certification by **TCSion**- [Master Data Management for Beginners](#)
